

What ProofReady does.

Better feedback for students, better insight for staff.

01

FOR EVERY STUDENT

Marker-quality feedback

Criteria-anchored feedback in the voice of an experienced marker, on drafts before they are submitted.

02

BUILT ON NESA

Calibrated to the standards

Tuned to Marking Centre notes, band descriptors and glossaries, so it mirrors how work is marked.

03

TRACKED OVER TIME

A growing skill profile

Every submission builds a longitudinal picture of each student's strengths and next steps across the year.

04

FOR YOUR LEADERS

Cohort insights

Faculty and cohort analytics for heads of department and executives, measured consistently across cohorts.

05

SAFE BY DESIGN

Privacy and security

Australian data residency, no training on student data, and profiles that never store raw student writing.

And the detail that matters.

Integrity, integration and the work behind it.

06

KEEPS IT HONEST

Built-in guardrails

No marks or bands predicted, and no rewriting. It shows what to improve, never does it for them.

07

CLOSES THE LOOP

The Lesson Builder

Turns each student's feedback into a follow-up task pitched to their profile, ready to assign.

08

GENUINE WORK

Typed responses only

Pasting is blocked and typing is captured, so what a student submits is genuinely their own writing.

09

FITS YOUR LMS

Canvas integration

Single sign-on, roster sync and grade passback through Canvas, so nobody leaves the LMS.

10

TWO FACULTIES

Writing and Maths

Full support for written-response subjects and Mathematics, Years 7 to 12.
